Art Unit: 2609

## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to method for shaping network transmission, classified in class 370, subclass 235.
- Claims 15-20, drawn to Transmission rate-shaping system, classified in class
   subclass 230.
- III. Claim 11, drawn to Rate-shaping data structure system, classified in class 370, subclass 395.
- 1. Inventions III and I are directed to related products/processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a different function. Invention III is drawn to rate shaping data structure is different than invention I, which learns process regarding sender's transmission rate. Furthermore, the inventions as claimed do not encompass

Application/Control Number: 10/734,703

Art Unit: 2609

overlapping subject matter and there is nothing of record to show them to be obvious variants.

Page 3

- 2. Inventions II and I are directed to related products/processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a different function. Invention II is drawn to transmission rate shaping system is different than invention I, which learns process regarding sender's transmission rate. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
- 3. Inventions III and II are directed to related products/processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a different function. Invention III is drawn to rate shaping data structure is different than invention II, which learns transmission rate

shaping system. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Because these invention are independent or distinct for the reason given above and there would be a serious burden on the examiner if restriction is not required because the invention s have acquired separate status in the art in view their different classification, restriction for examination purposes as indicated as proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jatin K. Patel whose telephone number is 571-270-1839. The examiner can normally be reached on 8-5 Mon-Fri Est.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Garber can be reached on 571-272-2194. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
